

Na Li

Email: 26073167r@connect.polyu.hk

Address: Department of Language Science and Technology (LST), The Hong Kong Polytechnic University

INTERESTS

Language Understanding, 1/f Activity, Memory

EDUCATION

M.A. in Psychology

Southwest University, Chongqing, China

B.Eng. in Electronic Science and Technology

Hangzhou Dianzi University, Hangzhou, China

PUBLICATIONS & PATENTS

Publications

[1] Li, N., Yang, J., Long, C., & Lei, X. (2024). Test-Retest Reliability of EEG Aperiodic Components in Resting and Mental Task States. *Brain topography*, 37(6), 961–971.

[2] Wei, Y., Li, N., Mao, R., & Long, C. (2025). Examining Self-Other Distinction Inefficiency and Egocentric Processing in Lonely Individuals. (Under Review)

Patents

[1] Kong, X., Zhou, D., Li, N., & Pu, Y. (2025). A Method for Selecting Language Function Rehabilitation Corpus Based on Semantic Embedding and Neural Encoding. Chinese Patent Application No.CN 202511371878.0, filed September 24, 2025. Status: Pending.

RESEARCH EXPERIENCES

Research Assistant, Zhejiang University

Supervisor: Prof. Xiangzhen Kong, Department of Psychology and Behavioral Sciences

Neural Activity in Spatial Navigation

- Investigating how aperiodic intracranial EEG (sEEG) activity supports spatial navigation and reveals temporal dynamics during path integration.

Graduate Researcher, Southwest University

Supervisor: Prof. Changquan Long; Co-supervisor: Prof. Xu Lei, Faculty of Psychology

Reliability of Aperiodic EEG Activity

- Evaluated test-retest reliability of aperiodic components across varying data durations, task states, and analytical methods using Python and R, and proposed methodological recommendations to optimize reliability assessment.

AWARDS & HONORS

Zhejiang Provincial Government Scholarship

Oct. 2020

Meritorious Winner in Mathematical Contest In Modeling for Undergraduates

Apr. 2020

TECHNICAL SKILLS

Data Analysis : Python, Matlab, R

Technical Equipment : EEG, Eye-Tracking, TMS

LANGUAGES

English (IELTS 7.0), Mandarin Chinese (native)
